

OPTI-West Research & Faculty Development E-Bulletin

Volume 2, Issue 7

August 22, 2008

I am happy to present a course to OPTI-West residents!!

Entitled: Whys and Hows of Clinical Research

~~Arrowhead Regional Medical Center~~
~~Oak Room~~ **correction**

The topics below can be presented in 1-3 hours. Of course the more time, the more information will be given. I am most available for this activity before October 1, 2008. Let me know your preferences and a description of your facility's research culture. Of course the earlier in the academic year, the better for planning the research project. Residents and students of other training programs are welcome also.

- Advantages of the Physician/Researcher
- Coming up with Research Questions
- Identifying and working with a Mentor, Teamwork, and Funding/Budget
- Design and Types of Clinical Trials, CRFs, Statistical Considerations
- IRBs, Ethics, racial/gender representation
- Mining Databases
- Selecting mode of Publishing
- Scientific Writing
- Design of our course: Teams, mentors, co- and sub-investigators
- Other Topics

If you are interested in participating or would like more information, please contact:

Daniel Pearce, D.O., AAHIVS, Associate Professor of Internal Medicine, Chief, Division of Hospital and General Internal Medicine, Medical Director of HIV Services
Western University of Health Sciences
College of Osteopathic Medicine of the Pacific
309 E. Second Street Pomona, California 91766-1854
